NANO BIONIC

Imitating the perfection of nature

Continuous innovation is anchored deep in **Nanovista's** DNA. Our frames seek perfect ergonomics and aesthetics, as if they were a natural extension of the body. As a result of dedication, our engineers and R&D team are inspired every day by the science of BIONICS, the fusion between NATURE and TECHNOLOGY.

Today we go one step further in our designs by developing *Bionic Slek Nano* even further and introduce two new innovations: *Bionic Bridge* and *Bionic Shark*.

NANO BIONIC SLEEK

Is there anything lighter, more aerodynamic and more flexible than the wings of a bird?

The BIONIC SLEEK design, our thinnest and lightest temple that adapts perfectly to children's faces.

Bionic Slek is now available in three models: *Arcade*, *Replay* and *Crew*.

NANO BIONIC BRIDGE

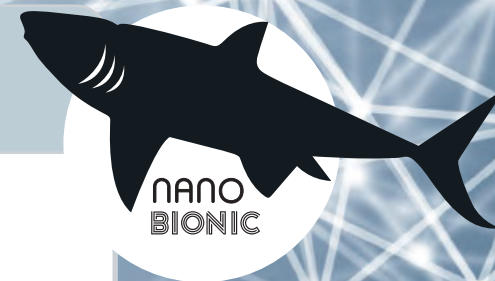

To adapt to the special needs of the youngest children, we have been inspired by the bottlenose dolphin (*Tursus Truncatus*). By developing a special inverted bridge curve that guarantees greater support and comfort.

Our new *Clipping* model is the first frame with a bridge inspired by bionics.

NANO BIONIC SHARK

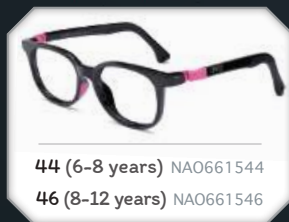

Touching perfection, little innovations that make a difference, that's *Bionic Shark*. A special double injection temple tip at the end of the temple, with a double function:

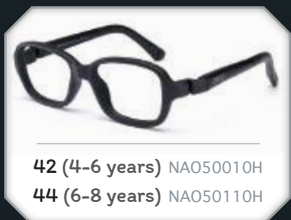

Ergonomic on the inner side, to improve the grip and comfort of the frame and an aesthetic functionality on the outer side, replicating the strength of a shark's gills.
