OUR PRIORITY: VISUAL HEALTH

The consequences of prolonged sun exposure during childhood can be severe, and compromise your child's eyes. At Nano Vista our main priority is to take care of the visual health of children at an early age, our Nano Vista's superior sun protection helps prevent harsh elements that can cause damage.

1

THE LENSES are our main defense against UVA rays and in children the ocular structures are not completely developed until the 8 years. In the first year of life, the baby's eye receives 90% of the UVA radiation and 50% of the UVB, so it should never be exposed to direct sunlight.

2

All lenses in our collection include ANTI-REFLECTIVE COATING on the inside to prevent glare and improve protection and comfort.

3

WE USE LENSES OF THE HIGHEST OPTICAL QUALITY as the new lenses *BlueBlock™* which protect from the harmful rays of the Blue Light and UV, while allowing a clear reception and natural colours.

THE BEST SUNGLASSES FOR KIDS

RESISTANT DOUBLE INJECTION AND ULTRALIGHT FRAMES. DESIGNED WITH SOMFLEX™, AN ULTRA-SOFT MATERIAL THAT PROVIDES HIGH QUALITY RUBBER FINISHES FOR GREATER COMFORT AND FLEXIBILITY.

THE IMPORTANCE TO PROTECT FROM BLUE LIGHT (HEV) AND UV RAYS OF THE SUN.

Prolonged exposure to High-Energy Visible Blue Light (HEV) and UV RAYS increases the risk of Age-related Macular Degeneration (AMD). The damage caused by Blue Light (HEV) and UV RAYS is cumulative, so if we correctly protect our eyes from the Blue Light rays (HEV), we will help prevent potential problems that could develop in the future.

To prevent this, at Nano Vista we have designed the best sunglasses for children with: Lenses with anti reflective coating inside of the lens, and a new scratch resistant coating on the outside lens.

*(as per reference).

NANO BABY: THE HIGH-QUALITY LENSES OUR BABIES NEED

LENSES PREPARED FOR OPTIMAL PROTECTION:

BLUE BLOCK LENSES *BlueBlock™*

Protect from the harmful rays of Blue Light, reducing the risk of future eye diseases (AMD).

POLARIZED LENSES

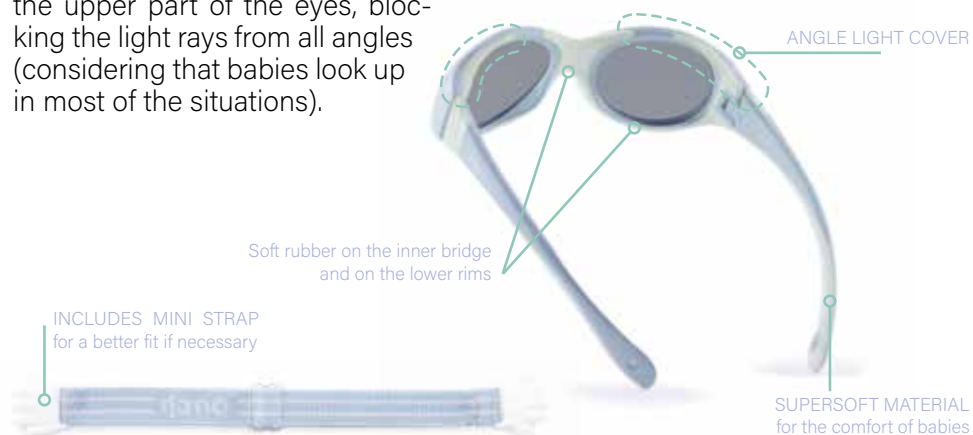

For protection against glare.

PHOTOCHROMIC LENSES

Offer an adaptive change of intensity to ambient light, a technology never seen in sunglasses for babies.

ERGONOMIC DESIGN FOR BABIES:

Our total protection design philosophy includes the innovative "**angle-light cover**": A thin protective spoiler that allows the perfect fit around the upper part of the eyes, blocking the light rays from all angles (considering that babies look up in most of the situations).

THE FUNNEST SUNGLASSES !!!

The original Nano Hands sun protection frames are made of high quality **polycarbonate: they are impact resistant and lightweight.**

In addition, you can distinguish them by the striking decoration of their temples, with fun and colorful illustrations of universal symbols of union and understanding, the hands, which represent the emotions and expressions of children.
