

NANOGLOW

**INDESTRUCTIBLE FRAMES THAT
GLOW IN THE DARK**

NANOGLOW

#indestructible

Manufactured with **Siliflex™**, a patented material of maximum strength and flexibility that makes the frames unbreakable and 35% lighter than acetate glasses.

Emotional safety

Fluorescent colors allow kids to find their glasses in the dark easily and quickly.

Road safety

The glasses become a protective element in low visibility conditions, allowing children to be seen better in the dark.

NANOGLOW 3.0

GLOWS IN THE DARK!

NANOGlow is back, the **INDESTRUCTIBLE** glasses for children that glow in the dark. Ultra resistant, super flexible, lightweight and hypoallergenic. And now with more GLOW and lots of FLOW!

Kids love them! Try them out at the optical store and surprise them. But first recharge them in the sun.

Thanks to the fluorescent glow on the temples, these frames allow children to feel safe at night, they will easily find their glasses if they wake up in the middle of the night and increase their safety by preventing accidents. The illumination gives great visibility while wearing NANOGlow **and are a blast!**

COLD GLAZING

BRIGHTER THAN EVER!
